

# IIIT Kottayam - Topmost IIIT in India - Promoting Culture of Innovation to Establish an Industry-Supported Global Education Hub

In the recruitment process, the First choice of IT Companies is “the Innovative Brain”. The curriculum is important for developing Innovative Brains but can’t cover all the parameters needed to nurture innovative brains. The goal can be achieved by creating a fertile land for developing a culture of Innovations through a variety of ways and strategies, which are not part of the curriculum. It’s a way to establish an Industry Supported Globally recognize education hub.

As of today, we have 70+ faculty, 1665 students including 102 Ph.D. / Post Doc scholars, and 222 MTech students (working professionals from 200+ IT companies many of them are having 5 to 15 years of IT Industry experience).

Our final product or output is nothing but the quality of our students, which is acceptable to the IT industry and globally renowned Institutes for higher studies. Every institute tries to map the academic activities in the curriculum. But curriculum design has limitations. The IT Industry wants **innovative programming brains** with

1. Knowledge of recent technologies,
2. Hands-on experience,
3. Research-oriented problem-solving attitude,
4. Real-time industry experience with international exposure,
5. Knowledge of complexities of software design
6. Experience in working and team and leading the teams

backed by internationally accepted Certifications etc. The curriculum may not give justice to all these parameters. It can be achieved by creating a culture of Innovation, through different routes, which are not part of the curriculum. Let's see how we "the IIIT Kottayam community" resolved this issue through **14 points program** and are producing INDUSTRY 4.0 READY students. This year (2023), to date, in B.Tech. final year, **One Student got Rs. 58.93 p.a. Lakh pay package, 03 students got a pay package of Rs. 45 Lakh p.a.** and **09** students got a package above Rs. 30 Lakhs p.a., **02** students got International Offer from Japan and the average package is Rs.14.3 Lakhs.

## I. Nurturing Innovation Culture through Funded Research Projects

1. Projects -Sanctioned: **103** (worth 27.04 Crores)
2. Funding Proposals under various stages of evaluation & considerations: **206** (worth 347.21 Crores)

Total: **309** Projects worth **Rs. 374.25 Crores**

## II. Nurturing Innovation Culture through Incubation Centers and Start-ups

3. Incubation Centers:
  - MSME Incubation Center: Submitted **144** Start-up project proposals (Rs. 21.41 Crores) and incubated **03 start-up companies** with funding.
  - AIC Incubation Center (NITI Aayog) - Submitted **34** (Rs. 41.53 Crores) Start-up project proposals and **incubated 35 start-up companies**

Total: **178** start-up funding proposals worth **Rs. 62.94 Crores**

The details are provided in **Table numbers 48 to 52** at the end of this document.

Thus, in last 4 years, Sanctioned and Submitted Projects in Research & Innovation Category are **487** (i.e. 309 + 178) and total project cost is **Rs. 437.19 Crores.**

That is, **Rs. 4.36 Billion**

### III. Nurturing Innovation Culture through Coding / Programming Culture

1. Online Teaching, Learning, and Training: On 26 Jan 2021, started YouTube Channel for providing high-level training for C/C++ languages. Till date uploaded **607 Videos**, which is equivalent to 3 months of training. Got an overwhelming response. More than 23000 (Twenty-Three Thousand) views in just 5 months.

3. To boost the programming culture, we have made appropriate changes in the curriculum. In most of the IITs, and NITs the first year is common for all branches. Thus, computer engineering students need to study the subjects like Chemistry, Physics, Engineering Drawing, Engineering Mechanics, Engineering-Workshop, etc. Thus, in IITs and NITs, computer engineering students can't focus more on programming in the first year. The IIIT Kottayam, in the initial 4 semesters, removed these subjects and introduced many programming languages, Data Structure I, III and III and Computer Algorithm. Thus, our students get the required exposure and competitive edge for participating in Global Coding Competitions and Hackathons than students of IITs and NITs.
4. To produce globally employable students, in addition to Coding / Programming Clubs, our 12 faculty members are providing training in Programming, Data Structures, and Algorithms in the evening extra coaching classes for developing “6 Star Coders” and preparing the students for Global Coding Competitions and Hackathons.
5. Our students got many prestigious prizes and awards. Let's see the **Coding Performance** of IIIT Kottayam Students:

## VIII. Nurturing Innovation Culture through Internationalization

Pave the way to build the international expertise	Can offer new opportunities for collaboration with the developed world and Widen Job Prospective.	IT Engineers need to work with an internationally diversified team. They must know different cultures and international trends to efficiently work with the project team. Thus international exposure is always very helpful to build a career, which enhances global employability too.
Increase the access to international markets	Helps to build an International Brand Name.	
Enhance the quality of research	International diversified exposure enhances creativity and Enhance scientific innovations.	
Increase intellectual resources of university		
Open the doors for International Funding for infrastructure development, research and events etc.		

### Benefits of Strong International Interface to faculty and students of IIIT Kottayam

Most of the Foreign Universities are not like our fully funded universities. They need to generate their own revenue. The government support is limited. Thus, they are always interested to enhance their revenue generation and to provide the financial benefits to their nation. They come forward and join the hands with Indian universities only if there is a **Win-Win situation**. Thus, for developing international interface, the Indian Institutes should prefer a **Two-Way International Interface** so that Institute, as well as foreign universities, will be benefited. That is, apart from our interest we need to consider interest of foreign universities, which are shown in following 4 blue boxes. They are always interested to reach lakhs of young technical personal through Indian institute for building their brand name and in turn revenue generation. It is possible only if the Indian institute has well-qualified and highly productive faculty, talented students and huge networking of young technical talent across the nation, which is developed by conducting hundreds of events by the institute such as webinars, conferences, seminars, workshops, FDPs, etc. This talent pool could contribute to the growth of foreign university as well as the economy of their nation. That is why, the foreign universities are interested to collaborate with only such kind of Indian institutes.

### Benefits of International Interface to Foreign Universities / Organizations / Nations

“International Students” is more than \$100 Bn market. The main supplier of international students are China & India. All the foreign universities are interested to capture this market. If your institute has good brand name and huge networking with technical community then your institute could be most attractive destination for foreign universities.	All most every developed country is facing shortage of young technical manpower and India is having huge young technical manpower (students as well as faculty). The foreign universities are interested to attract this young & talented technical manpower from India to build their economy.	The innovation has become backbone of every economy. Thus, in developed nations, there is huge requirement of innovative brains. Many times the talented manpower in India is not ready to join foreign universities. Thus the collaboration is the first step to tap these brains. Thus, foreign universities are interested to collaborate with Indian universities.
---	---	--

Because of Currency Exchange Rate between Rupees and Dollar/Euro/Pound, it is easy to attract the young technical manpower from India. Almost every foreign university wants to encash this situation.

Fig. 04: Two-Way International Interface is possible only if there is a Win-Win Situation

## IX. Nurturing Innovation Culture through Boosting Learning Attitude & Learning Beyond Syllabus

1. Organized more than 100 Webinars for students and faculty during the Covid-19 Pandemic in which speakers across the globe participated and delivered talks on various latest technologies.
2. In IT, the absorption rate of technologies is very high and no curriculum in the world can teach all the latest IT Technologies. Thus, students need to learn beyond the syllabus through various Professional Certification options such as Coursera, Udemy, Ed-Tech, Swayam, NPTEL, Java, Oracle, etc. In the recruitment process, IT companies are looking for lifelong learners. That is, they want candidates with a Learning attitude and desire. The students can show these only through these certification courses. Most of the students of IIIT Kottayam are actively involved in this activity. **More than 600 students** have done these certification courses. The following chart shows only a few of them. During Covid Pandemic, we got free access to Coursera under “Coursera for Campus Response Program”.

## At a Glance Performance of IIIT Kottayam in the Last 5 Years (2019-24)

IIIT Kottayam has started in 2015. Since 2017, Prof. Ramakrishnan Mentor Director, and Dr Radhakrishnan Mentor Registrar (now Registrar of IIIT Kottayam) had taken the charge. They had taken a lot of effort and created a strong foundation for IIIT Kottayam. Thus, just within 2 years, in Jan 2019, the IIIT Kottayam could be shifted from a temporary campus at Trivandrum to a Permanent Campus near Pala. The Permanent IIIT Campus was inaugurated on 20<sup>th</sup> February 2019 in the hands of Hon. Prakash Javadekar, then Union Minister of Human Resource Development (MHRD). In 2019, out of 20 IIITs, only 3 IIITs in India could do so. It's great achievement and very important milestone for IIIT Kottayam. This has provided a strong foundation for establishing one of the best IIITs in India. Credit goes to the mentor Director and Registrar.

Just after the inauguration of IIIT Kottayam permanent campus, Prof. Rajiv Dharaskar joined as a Founder Director on 1<sup>st</sup> March 2019. After that Prof. Dharaskar, Dr. Radhakrishnan, and the entire IIIT Kottayam team worked day and night and could build one of the topmost IIITs in India. Let's see at a glance performance of **last 5 years** of IIIT Kottayam.
